

## Candidate Survey Questions

From Charles Al-Bawi  
Candidate for Mayor.

**1. *If elected, would you support a comprehensive and equitable community-wide Climate Action Plan to reduce Knoxville's carbon emissions in half by 2030?***

Yes.

**2. *How would you engage the community in developing this plan?***

First, I would work with KUB to source the City's electricity from solar, wind, and hydroelectric sources. Second, I would work with the City's departments to source our transportation needs with electric and/or hybrid vehicles. Third, I would have community meetings to work on see what incentives can be put in place to encourage our businesses and homeowners to cut their carbon emissions.

**3. *What would be your timeline from the launch to develop the plan to when the city would put the plan into action?***

I believe it would take two years to get the plan from development to launch.
